

Triplex High Barrier High Shrink Bags

- Seal Integrity
- Extended Protection
- Cost Effective

FOOD PACKAGING
AND EQUIPMENT

Adding value to your products since 1949

Globus Bags for every end use

Applications Smallgoods
 Fresh Red Meat
 Cheese
 Poultry Products

Material Types Triplex FM General Use, providing superior Barrier & Seal Integrity. Available gauge 60 microns.

Triplex FM HA Suitable for some bone in products or where the application requires a tougher bag. Available gauge 60 microns.

Triplex K High Barrier Shrink Bags possessing excellent oxygen barrier properties. Triplex K is heat transferable, provides a high gloss finish highlighting the enclosed product with a fresh and natural appearance. Available gauges 60, 70 and 80 microns.

Krehalon ML40 – MU90 High puncture resistance for all hard-to-pack products. Ideal for bone-in product. High shrink, superior optical properties provide an almost glass-like second skin to packaged products. Available gauge 90 microns.

Krehalon ML40 – X130 Designed for the most demanding applications. Ideally suited for bone-in products. The bag structure combines high shrink, superior optical properties with high strength. Available gauge 130 microns.

Seal Types Straight
 Curved
 Side
 Shank
 Serrated rolls

Printing 8 colour front, 8 colour back
 Located
 Continuous
 In-line stamp
 Maximum repeat length 820mm
